About The Event

Explore the exciting world of drones in our exclusive webinar series led by expert companies. These webinars are curated so as to offer enriching latest advancements in the field of drone technology. Also emphasizing the different practical insights on surveying, mining and regular checks on construction sites using drone mechanisms.

Whether you're a beginner or an experienced drone enthusiast, these webinars are intact with valuable knowledge to grow your skills to newer heights.

Aerovantage

From ancient mythological tales to cutting-edge technology, India's journey in drone innovation has soared high. With a rich history of imagination and inventiveness, the land of diversity has nurtured a thriving ecosystem of drone-based startups. Today, India stands proudly among the global leaders, harnessing the potential of drones to revolutionize sectors like agriculture, infrastructure, and defence showing its presence on the world map of drone technology.

Get ready for an exhilarating experience as AeroVantage, an esteemed webinar series curated with India's top drone agencies organized by the official Idea Innovation Cell, takes flight on July 3rd.

Our exclusive series will be streamed live on our YouTube channel. Gear up your excitement and do join us for a remarkable journey into the future of aerial technology.

WEBINAR WEEK 1

The first day of AeroVantage's webinar series is about the Sagar Defence Agency, the developer of India's first human-carrying drone, "Varuna" which is developed to assist the Navy and safety personnel while transferring people between warships and natural calamities.

WEBINAR WEEK 2

The second day of the series is dedicated to IG Drones, India's leading drone manufacturing firm. It has provided many solutions for surveying, mapping & inspection with the help of drones. As a startup incubated by Mr. Bodhisattwa Sanghapriya from our very own University, he recently developed a 5G-enabled drone capable of vertical take-off and landing.

WEBINAR WEEK 3

The third day of the webinar series is with Bon V Aerospace Company. A growing startup from our very own city bhubaneswar. It had developed India's first AI-powered multi-utility electrical air vehicle, and also played a important role for using drones in commercial applications. The co-founders are Satyabrata Satapathy and Rahul Kumar.

WEBINAR WEEK 4

The fourth day of the series is focused on Aeronica advance technologies pvt. ltd. Which is a startup India entrepreneur initiative to build Agri-Technology solutions using Advance Remote Sensing techniques.
